

MEETING PACKAGE

Discover our Sustainable Meeting Program

Le Meridien Cairo Airport has introduced Sustainable Meetings with the intention of reducing our carbon footprint. This simple and effective way of conducting meetings will reduce your impact on the environment by means of reduction in paper wastage, power conservation and even by selecting a menu prepared with local produce only.

Sustainable Green Meetings will include the following:

- All notepads, pens and nuts will be placed on a separate table, encouraging your participant to use only what is required and avoid wastage.
- The entire contracting process will be done electronically. This will avoid printing and wasting of paper. Email will reduce the need to print or fax pages back and forth.
- LED energy saving globes in all meeting spaces reducing electricity consumption by 80%.
- LCD energy efficient digital meeting signage.
- Le Meridien uses Post-Consumer Waste paper, helping to conserve our natural resources.
- Utilized potted plant displays are used instead of fresh cut flowers.
- The hot water generated by the air-conditioning system in the venues as well as in guestrooms is being reintroduced into our boilers which, in return, reduces the energy consumption levels.
- The selection of seafood products used within the preparation of menus are from the consumer's species list which means that the seafood species are legal and more sustainable choices
